#### **CERTIFICATE No 04 – 16**

# REFERENCE MATERIALS OF ALLOY STEEL for solid sample spectrometry, combustion and wet-way methods

## SPL CM-17A, CM-18A, CM-19A

- **Certified** fully compliant with the ISO Guide 35 definition of Reference Material with the characterization for determining the property values and their associated uncertainties.
- **Intended** for calibration, matrix-match verification and statistical process control of steel spectrometric analysis from a plane of solid sample. They may not substitute CRM in a statement of metrological traceability, method validation. A single analysis area of at least 4 mm in diameter defines the minimum sample intake. They may be used for combustion and wet-way methods too.
- **Manufactured** by casting to a special ingot with discarding of the parts, which have been suspected inhomogenous and the rest has been machined to the samples of the ultimate size.
- **Supplied** as discs 37 mm in diameter and 25 mm of standard height, as option is possible up to 50 mm height and on request steel chips for combustion and wet-way methods.
- **Homogeneity** (random and trend, within- and between- samples) was tested by various analytical techniques of adequate repeatability. Its uncertainty contribution, when statistically significant, was combined to the ultimate uncertainty statement. The RM are stable by a nature of material.
- Characterised by results from SPL proficiency tests PT 22/6 (CM-19A), PT 23/6 (CM-17A) and PT 24/6 (CM-18A) laboratories by various spectrometric methods (AES spark, glow discharge, XRF) and alternative methods (combustion, thermoevolution, wet-way) standard methods, with measurements metrological traceabled to adequate CRM (CZ 2001, 2003 2008, 2015-2024, BAS, Brammer Standard). Identity of PT participating laboratories is confidential.

### Participating countries

- CM 17A (PT 23/6) Czech Republic (21), Russia (7), Slovakia (2), Ukraine (2), Great Britain (1), Poland (1), Iran (1), 24 laboratories in total.
- CM 18A (PT 24/6) Czech Republic (19), Russia (5), Slovakia (2), Sweden (2), Spain (1), Ukraine (1), Great Britain (1), Bulgaria (1), 32 laboratories in total.
- CM-19A (PT 22/6) Czech Republic (21), Slovakia (6), Russia (3), Ukraine (1), Austria (1), 32 laboratories in total.

Certified values in % m/m, tabulated below in bold, are robust means of a minimum five accepted laboratory means. They are rounded to the same digit as their uncertainty statement.

**Uncertainty** is expressed as  $a \pm half$  width interval combined from the standard uncertainty, expanded by the coverage factor k = 2 (corresponding to 95% level of confidence). It does not exceed 1,5 multiple of the typical uncertainty of the matching CRM.

**Non-certified values** in regular without the uncertainty statement do not meet the requirements for certification and are intended for the matrix information.

**User instruction:** the surface of the specimens and RM should be prepared in a similar manner in accordance with manufacture's instructions of spectrometers. It is recommended to storage of RM in dry and non-corrosive conditions.

**Produced by:** SPL, the authorised producer of CRM for the Czech Metrology Institute and the provider of the interlaboratory Proficiency Testing accredited by the Czech Accreditation Institute, in a strict compliance with ISO/IEC 17025, 17043 and in particular with ISO Guide 34 and 35.

Responsible person: Martin Bogumský

**Issued** in Bohumín on November 2016
